EPA Proposed Plan to Clean-up the Lower Duwamish Waterway
Superfund Site
EPA Region 10
1200 6thh Ave- Suite ECL-111
Seattle, WA 98101

To Whom it May Concern:

As an employee of Sea Mar Community Health Centers and a community member of the South Park neighborhood in Seattle, I would like to ask that the EPA strengthen the final plan for cleaning up the 5.5-mile Lower Duwamish Waterway Superfund Site. Please consider the following factors in your plan to clean up the Duwamish River:

- Assure that there will not be a need for further cleanup of the Duwamish River in the future. It is more cost effective to spend more money upfront to achieve a level of cleanliness in the Duwamish River.

- Allow for safe eating of resident fish and shellfish.

To achieve these goals, the following are required:

- Dredging of larger areas of the riverbed than in the present plan
- Enhanced capping of additional areas,
- Adding to the current plan requirements to control Green River recontamination.

The South Park neighborhood is not only home to residents of the community but to employees of Sea Mar who spend a large amount of their day working in this community. The neighborhood of South Park has demonstrably lower life expectancies than any other Seattle neighborhood. The residents and workers of South Park deserve a healthy environment free of harmful environmental factors.

The cleanup of the Duwamish River will directly benefit Sea Mar CHC's patients, employees and the South Park community. Thank you for your consideration
